

RAHAT IZHAR, Ph.D.

Software Engineering | Artificial Intelligence | Intelligent Systems | Academic Leadership

Bangkok, Thailand | rahatizhar23@gmail.com | ORCID: 0000-0001-9573-4012 | GitHub: rahat-23

ACADEMIC PROFILE

Computer Engineering Ph.D. and university Lecturer/Head of ICT with an academic profile spanning Software Engineering, Artificial Intelligence, Machine Learning, Natural Language Processing, Data Science, computing education, research supervision and programme leadership. Requirements Engineering is a core research foundation, while current and emerging work extends into software analytics, trustworthy AI, computer vision, applied intelligent systems, healthcare, agriculture and decision support. Experience combines peer-reviewed research, broad undergraduate and MBA-level teaching, curriculum and assessment design, quality assurance, student/postdoctoral mentoring, peer review and international academic engagement.

CURRENT ACADEMIC APPOINTMENTS & LEADERSHIP

Head of ICT Department

25 Jun 2026 - Present

British International College, Krirk University, Bangkok, Thailand

- Lead ICT academic coordination, curriculum implementation, faculty support, assessment alignment, examination moderation, programme documentation and continuous-improvement activities.
- Support student progression, technical/final-year projects, internships, recruitment and programme-level academic engagement.

Lecturer

01 Aug 2024 - Present

British International College, Krirk University, Bangkok, Thailand

- Teach undergraduate and MBA-level subjects across programming, OOP, algorithms, networks, web development, AI-IoT, systems analysis, data science and Information Systems for Business Management.
- Design course outlines, learning materials, practical activities, assignments, examinations, rubrics and LMS-supported learning for international cohorts.

EDUCATION

Ph.D. in Computer Engineering | Chiang Mai University, Thailand | 21 Jun 2021 - 13 Jun 2025

Doctoral research on AI/NLP-enabled Requirements Engineering in Agile software development. Thesis: "Analytical Impacts of Requirements Management in Agile Methodology." Recipient of the Chiang Mai University Presidential Scholarship (2021-2024).

M.S. in Software Engineering | Bahria University, Islamabad, Pakistan | 06 Sep 2017 - 06 Sep 2019

Graduate focus included Requirements Engineering, Software Testing & Quality Assurance, databases, software metrics, project management and object-oriented software design. Research addressed ERP requirements elicitation and customization.

B.S. in Computer Science | SZABIST, Pakistan | 03 Sep 2012 - 30 Aug 2016

Computer Science foundation in programming, software development and information technologies. Final-year project: intelligent job recommendation system with Java MVC backend and Android frontend.

TEACHING, CURRICULUM & ACADEMIC LEADERSHIP

- Teaching portfolio: Basic Programming; Object-Oriented Programming; Data Structures & Algorithms; Computer Networks; Web Design & Development; AI & IoT; Information Systems Analysis & Design; Fundamentals of Data Science & Data Analytics; MBA Information Systems for Business Management.
- Teaching approach: structured conceptual explanation combined with live coding, worked examples, data analysis, simulation, project-based learning, case studies and guided analytical practice.
- Curriculum and quality: course design, learning outcomes, assessment design, rubrics, examination moderation, programme documentation, quality-assurance evidence and continuous improvement.
- Supervision and mentoring: undergraduate technical/final-year projects and current postdoctoral research mentoring with emphasis on reproducibility, evaluation quality and publication development.

RESEARCH PROGRAMME & SCHOLARSHIP

- Software Engineering and requirements intelligence: requirements classification, ambiguity analysis, semantic grouping, traceability, prioritization, meaning-preserving refinement and software-quality analytics.
- AI, NLP and LLM-enabled systems: machine learning, semantic similarity, transformer-based representations, language intelligence and AI-assisted software-engineering workflows.
- Trustworthy AI: explainability, robustness, generalization, ablation, metamorphic testing, failure analysis and reproducible empirical evaluation.
- Applied intelligent systems: interdisciplinary work in biomedical imaging, agriculture/plant-disease robustness, logistics/cold-chain decision support and other data-driven application areas.

SELECTED RESEARCH PROJECTS & CURRENT DIRECTIONS

HLSRP - Meaning-Preserving Requirements Refinement | *Software Engineering / NLP*

Hybrid linguistic-semantic refinement of natural-language requirements using sentence embeddings, semantic-drift controls and external evaluation.

Beyond Random Splits | *Software Analytics*

Multi-axis generalization audit of bug-report resolution prediction across lexical and semantic representations, emphasizing realistic evaluation beyond random train-test splitting.

Explainable Cold-Chain Decision Support | *Applied AI*

Machine-learning failure prediction with explainability and LLM-assisted recovery recommendations for operational logistics settings.

Metamorphic Testing for Plant-Disease Classification | *Agricultural AI / Robustness*

Current supervised work on robustness evaluation under lighting, blur, rotation, occlusion and background changes using baseline deep-learning models and metamorphic relations.

SELECTED ACCEPTED / CURRENT RESEARCH PIPELINE

- "An Explainable AI and LLM-Based Work Logistics Framework for Cold-Chain Shipment Failure Prediction and Recovery Decision Support" - accepted for ICL 2027.
- "Beyond Random Splits: A Multi-Axis Generalization Audit of Bug Report Resolution Prediction Across Lexical and Semantic Representations" - journal manuscript under review, 2026.
- "HLSRP: A Hybrid Linguistic-Semantic Framework for Meaning-Preserving Refinement of Natural Language Requirements" - submitted 2026.

ACADEMIC SERVICE & INTERNATIONAL ENGAGEMENT

- Peer reviewer: ACM Transactions on Software Engineering and Methodology (TOSEM), Information Processing & Management, e-Informatica Software Engineering Journal, and IEEE Horizons of Information Technology and Engineering (HITE) 2026.
- Invited Resource Speaker, Universitas PGRI Madiun, Indonesia - "Cybersecurity Awareness," 11 June 2026.
- Invited Speaker, ICONIES 2025, Indonesia - "Harnessing Artificial Intelligence to Advance ESG and Islamic Economic Values."
- Invited Expert Speaker, GL Bajaj Institute of Management & Research, India - "Data Modelling Techniques in a Global Context," February 2025.
- Presenter, IEEE JCSSE 2024, Phuket, Thailand; international student skills-competition mentoring and academic outreach activities.

EARLIER ACADEMIC & INDUSTRY EXPERIENCE

English / Computing / Mathematics Teacher & Teacher Coordinator | *Laohajit Wittaya School, Thailand* | 14 Nov 2019 - 17 May 2021

Taught varied learner groups and supported classroom coordination in physical and hybrid learning environments.

Teaching & Research Assistant | *Bahria University, Pakistan* | Nov 2017 - Oct 2019

Supported Software Engineering, C++/Java Programming and Web Engineering laboratories and contributed to ERP requirements research.

Business Analyst | *4SGlobal Pvt. Ltd., Pakistan* | Oct 2017 - Jan 2018

Analysed business workflows, translated stakeholder needs into technical specifications and contributed to ERP/reporting work.

Junior Executive IT Officer | *SyntecX, Pakistan* | 16 Aug 2017 - 03 Oct 2017

Worked on full-stack web development using PHP, HTML/CSS, JavaScript, Bootstrap and APIs in an Agile environment.

Software Development Intern | *SyntecX, Pakistan* | 16 Jan 2017 - 16 Jul 2017

Contributed to web/application development and practical software-engineering workflows.

Data Warehouse / IT-BSS Intern | *CMPAK Zong HQ, Pakistan* | 06 Jun 2016 - 06 Sep 2016

Supported BI planning, data analysis and performance reporting using Oracle, Teradata SQL and IBM Cognos.

IT-System Development Intern | *Zarai Taraqiati Bank Ltd. (ZTBL), Pakistan* | 15 Jun 2015 - 29 Jul 2015

Developed a C#/.NET and Oracle-based contact directory, automated Excel reporting and supported database tasks.

TECHNICAL & PROFESSIONAL COMPETENCIES

AI / Data / Research | *Python, scikit-learn, NLP, Transformers, semantic similarity, Pandas, NumPy, SHAP, robustness evaluation*

Machine learning, language intelligence, explainability, generalization testing, empirical evaluation and reproducible research.

Software Engineering & Development | *Requirements Engineering, SDLC, testing, system analysis, Java, C/C++, C#, JavaScript, PHP, SQL, HTML/CSS, REST/API*

Software analysis and design, programming, web/application development and data-oriented systems.

Academic Practice | *Curriculum design, assessment, quality assurance, supervision, peer review, research writing, academic leadership*

Programme coordination, international teaching, student mentoring and scholarly service.
